Please give a brief summary of what your job entails:

Masterclass Cricket Academy
My job is to provide a professional coaching service to all my clients. Who are all of mixed abilities from beginners to Elite professionals.

What method of data storage are you using currently, and what are the limitations you are experiencing:

I currently only use multiple Word and Excel files to keep a record of all my pupils and this limits me in how much information I can store about them as it starts getting messy. If the business continues to grow at this rate I will not be able to store all the data.

Would you be interested for your application to be password protected (yes or no):

Yes

Would you like the application to only hold information pertaining to the pupils you coach or would you also like to include personal information regarding your association with the cricketing company:

Information of my clients.

If you agreed to the database holding information regarding your personal association with the cricketing company, what type of data will it hold (add more info to include about you and your company):

• Name
• Age
• DOB
• Salary money coming in via cash or card
• Company Info
• Address

If all the pupils were in a list, would the ability to sort/search them by age, name, gender, etc. be of any interest to you (yes or no):

Not a major feature

What information would you like to store about the pupils (continue):

• Name
• Age
• Gender
• DOB
• Right-Hand Batsman or Left-Hand Batsman
• Cricket Experience
• Cricket Aspirations
• Payment Plan
• Email
• medical info and Emergency contact number

This is an application completely personalized to suit you. What else would you like to include (include all your ideas):

• Ability to arrange coaching session and store relevant documents to a session or a pupil
• Ability to remove and add pupils
• Ability to know the amount of income generated

In case of injury, there will be an emergency form to be completed for the pupil, what will this emergency form/note entail:

• Time of injury and time required to heal
• Injured body part
• What to do and who to call
• I am first aid qualified
